

Weekly Update — Aarav

Week of 04-May-2026 to 10-May-2026 · Class 11-A · Vidya International School, Indore

A breakthrough week in Physics Mechanics — and a small Chemistry slip we should address before mid-terms.

Highlights

- Physics**
Mock Test 4 on Mechanics: 78%, up from 62% on Mock Test 3. The chapter rework plan worked.
- Mathematics**
Steady at 88% on the Calculus quiz. Strong base.
- Coding Club**
Built a small Python script for the Robotics Club. Real-world reinforcement of his interest signal.

Watch-outs

- Chemistry**
Slip from 71% to 64% on Mock 4. Organic Chemistry needs 2-3 hrs of focused revision next week.
- Sleep pattern**
Class teacher noted Aarav looked tired on Wednesday. Worth a check on study-load distribution.

Plan for Next Week (11-May to 17-May)

Day	Subject	What to do	Time
Mon-Tue	Chemistry	Revise Organic: Hydrocarbons + 30 NCERT problems	4h
Wed-Thu	Physics	New chapter: Rotational Motion - concepts + worked examples	4h
Fri	Maths	Continuity & Differentiability - worksheet	2h
Sat	All PCM	Mock Test 5 (Physics + Chemistry combined)	3h
Sun	Free / Coding	Rest + 1 hr coding project of choice	1h

Big Picture

This term's headline goal: Achieve 85%+ in all three PCM subjects by Term 1 exam (June).
Progress: 64% — Strong on Maths, on track in Physics, behind on Chemistry. The next 3 weeks are pivotal.

A Note from the School

"Aarav's engagement in the Physics class debate this week was excellent — he explained Newton's third law to two classmates better than my own example. We'll continue to nurture this peer-teaching tendency."

— Mrs. Kavita Reddy, Class Teacher

Why this plan?

Aarav's marks are pointing toward a STEM-Engineering trajectory, with Computer Science as the strongest fit. His Physics turnaround this week confirms his ability to recover when given a focused plan. Chemistry is a temporary setback — addressable with 6 hours of organic-chemistry revision over the next 10 days. We are NOT recommending Aarav reduce his Coding Club time — that's the interest signal that gives confidence to the CS hypothesis.
